## Electrical \& Electronics (E\&E) Segment

The E\&E Segment Gross Revenue at ₹ 782 crore for the quarter ended September 30, 2011 recorded a growth of $21 \%$ over the corresponding quarter of the previous year, even in a sluggish market.

The Segment margin at $10.7 \%$ during the quarter was maintained almost at the same level seen in the immediately preceding quarter, despite an unabated increase in key input costs.

## Machinery \& Industrial Products (MIP) Segment

The MIP Segment recorded Gross Revenue of ₹ 666 crore during the quarter ended September 30, 2011 on the back of a general downtrend in the industrial off-take.

The Segment earned an Operating Margin of $17.7 \%$ during the quarter ended September 30, 2011 mainly contributed by the Construction \& Mining Machinery Business.

## Outlook

The current slowdown in investment momentum witnessed in almost all sectors of the economy, is constraining growth opportunities. Intensifying competition, high inflation, elevated interest rates, volatile financial markets and delayed policy intervention are posing considerable challenge for the decision-makers. Irrational pricing offered in the market place for the limited pie of opportunity, is yet another factor to reckon in selection of remunerative projects to participate in.

While keeping itself ever agile to win every worthwhile prospect meriting attention, be it in the domestic or in the international market, the Company is focused on timely execution of its large order book.

In the medium term, the Company sees itself in a strong position to maintain its revenue growth trajectory and stay totally prepared to benefit from opportunities when they materialise.
