Outlook

A pick up in investment is crucial to sustain economic growth in the medium and long term. The investment climate in India is yet to gather pace, particularly in the private sector. High corporate debt levels, balance sheet challenges of banks, weak industrial & rural demand and sluggish exports are posing hurdles to the investment momentum. Both Central and State Government led push to capital expenditure holds the key to accelerate the growth engine.

Good progress of monsoon and pay revisions for govt employees are expected to spur household demand. The intent of the government to pursue economic reforms is visible thru passage of bankruptcy code, as well as efforts to build consensus on GST bill and attract foreign investments to make India a hi-tech manufacturing hub. Government initiatives for development of smart cities, building up robust infrastructure thru rail corridors, metro rails and roads, focus on defence manufacturing, increased outlays for augmentation of water resources and renewable energy augur well for the Company.

On the international front, the Company will continue to target select prospects in the space of core infrastructure and Oil & Gas sector in the Middle East, Africa and other neighbouring countries.

The Company has recently finalised its strategic plan for five years with a focus on profitable growth. The Company remains well placed to benefit from emerging opportunities with its execution capabilities and leadership position in various sectors.
