L&T Flags Off Reactors to Mexico's Second Largest Refinery

Hazira (Surat, Gujarat), June 2, 2023: The Heavy Engineering arm of Larsen & Toubro, flagged off 5 nos. reactors for PEMEX's Miguel Hidalgo (Tula) refinery in Mexico. These equipment will be dispatched to Pemex Transformación Industrial (PTRI), a subsidiary of Mexico's state-owned oil company PEMEX (Petróleos Mexicanos).

These reactors will be installed at the Tula refinery for desulphurization of fuel to produce a better and cleaner gasoline and other refined products. This is a benchmark project for L&T Heavy Engineering as it is the fourth consecutive order L&T has received for a Mexican refinery.

Mr. Anil V. Parab, Whole-Time Director & Sr. Executive Vice President, (Heavy Engineering & L&T Valves) said, "We thank PEMEX for their continued trust in L&T. Such back-to-back orders are a testimony to our unique ability in handling these complex equipment an endorsement of customer's confidence on our delivery performance. It's heartening to have lived up to the expectations of our client by ensuring on-time delivery of these equipment."

"This order demonstrates L&T's ability to provide high-quality products to the energy sector even beyond boundaries. Our focus on high-end products, in-house development of distinctive manufacturing technologies and various digitalization initiatives have positioned us as a reliable partner to our clientele" added Mr. Parab.

Commenting on the occasion, the representative of **Pemex Transformación Industrial, (PTRI)**, said, "These reactors are critical equipment for the refinery project in Mexico and we are delighted by the open, trustful and result-oriented approach of Team L&T in manufacturing these equipment meeting high levels of Quality, Workmanship and Safety requirements, while achieving timely delivery".

"The reactors supplied by L&T will contribute to Tula refinery's production of fuel and help meet the growing demand for gasoline and diesel in Mexico. This order will facilitate PEMEX's efforts to increase domestic production and reduce its reliance on imports. L&T has been

and will continue to be a valuable partner in our journey to modernize and upgrade our refineries”.

L&T’s ‘A. M. Naik Heavy Engineering Complex’ is a globally benchmarked, state-of-the-art, fully integrated, digitally enabled manufacturing facility. It continues to contribute to the “Make in India” mission. All L&T Heavy Engineering facilities are well equipped with Industry 4.0 solutions for engineered-to-order manufacturing. The heavy engineering business of L&T has a proven track record of supplying technology-intensive equipment and systems to global customers in the Refinery, Oil & Gas, Petrochemicals, Fertilizers and Nuclear Power sectors.

Background:

Larsen & Toubro is a USD 23 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing and Services. It operates in over 50 countries worldwide. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.
