L&T Semiconductor Acquires Power Module Design Assets of Fujitsu General Electronics of Japan

Deal includes patents, IPs, R&D equipment, strengthening India's presence in the global semiconductor market

Mumbai, September 05, 2025 : L&T Semiconductor Technologies Ltd (LTSC), a wholly-owned subsidiary of Larsen & Toubro, has acquired the Power Module Design Assets of Fujitsu General Electronics Limited (FGEL) of Japan. The strategic acquisition adds to the innovation and design strengths of LTSC.

As part of the deal, LTSC has acquired FGEL's R&D equipment, design patents and various intellectual properties related to power module technologies.

This will accelerate LTSC's foray in power electronics design and development and expand the company's product portfolio in its focus domains of industrial, energy and automotive applications.

Speaking on the acquisition, **Mr Sandeep Kumar, Chief Executive - LTSC**, said: "The acquisition of power module technology is a crucial step in LTSC's growth journey and an important step towards our vision of enhancing India's presence in the global semiconductor ecosystem. This significantly strengthens our global intellectual property portfolio, and enhances our design capabilities, thus reinforcing our commitment to delivering world-class semiconductor solutions globally."

Mr Tadashi Hasegawa, Director & COO - Fujitsu General Limited, added: "We are pleased to see our power module business become a part of LTSC - a leading semiconductor company from India that shares our commitment to innovation and technological excellence. We are sure that this transfer will ensure the continued development and expansion of cutting-edge power module technologies, benefiting global customers and driving industry-wide advancements."

About LTSC

L&T Semiconductor Technologies Ltd (LTSC), a wholly owned subsidiary of Larsen & Toubro, is a fabless global semiconductor product company focussed on designing and delivering innovative solutions and

comprehensive suite of services to customers. It offers semiconductor devices, solutions and technology partnership by helping customers realise energy- efficient, high-performance systems to benefit from data, electrification and software defined technology trends. LTSC has R&D centres in Bengaluru, Delhi and Chennai, and Product Engineering & Sales divisions in Austin, Munich and Tokyo.

About FGEL

Fujitsu General Electronics Limited (FGEL) is a subsidiary of Fujitsu General Limited, a Japanese company established in 1936 and headquartered in Kawasaki, Kanagawa. FGEL specializes in the development and manufacturing of Electronic Devices including power modules, which are critical components in various electronic applications, including automotive systems, industrial machinery, and renewable energy solutions. The company's expertise in power electronics complemented Fujitsu General's broader portfolio in electronics and HVAC (Heating, Ventilation, and Air Conditioning) systems.
