L&T wins multiple orders (Large*) to build grid elements forming backbone of clean energy transition

Mumbai, July 29 2024: The Power Transmission & Distribution (PT&D) business of Larsen & Toubro has won new orders in India and abroad for establishing substations and transmission lines which are crucial elements of the vast, interconnected electricity network. A strengthened grid speeds up clean energy transition and ensures reliable, resilient power supply.

In India, PT&D has received orders to execute two 765kV Double Circuit Transmission Line packages which are associated with evacuation of power from Jaisalmer/ Barmer Renewable Energy Zone in Rajasthan to substations in Madhya Pradesh for further interconnections.

In its pursuit of providing sustainable and efficient power supply, Saudi Arabia is strengthening the 380kV network in the central region. PT&D has secured orders to build a 380kV Substation and 380kV Overhead line segments.

In the United Arab Emirates, PT&D has secured orders to construct a 220kV Substation and three 132kV Substations. Adding these substations to the network will help the utilities keep pace with the increasing electricity demand in Dubai and Abu Dhabi.

Background:

Larsen & Toubro is a USD 27 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for over eight decades.

* Project Classification

Classification	Significant	Large	Major	Mega	Ultra-Mega
Value in ₹ Cr	1,000 to 2,500	2,500 to 5,000	5,000 to 10,000	10,000 to 15,000	> 15,000
