L&T secures a key role in TenneT's landmark Offshore Wind Programme

Mumbai, October 30, 2025: Larsen & Toubro (L&T) has achieved a major milestone in its Offshore Wind Business by securing a critical role in the prestigious High Voltage Direct Current (HVDC) offshore wind programme of TenneT, the Dutch German transmission system operator. This landmark development reinforces L&T's position as a key enabler in the global energy transition and underscores its commitment to advancing sustainable infrastructure.

Collaborating with Hitachi Energy, a global technology leader in electrification, L&T has been nominated by TenneT to deliver state-of-the-art HVDC converter stations. This initiative aims to accelerate the integration of large-scale renewable energy into the European power grid, particularly across the German and Dutch sectors of the North Sea.

The collaboration brings together complementary strengths in advanced technology, engineering excellence, and end-to-end project execution. It underscores L&T's growing global footprint in offshore wind and reinforces its commitment to enabling the world's energy transition through sustainable infrastructure solutions.

L&T's Offshore Wind Business is built on robust multidisciplinary capabilities, strategic alliances with global industry leaders, and a resilient supplier ecosystem and supported by three world-class modular fabrication facilities. L&T is uniquely positioned to execute large-scale offshore wind projects to the highest standards of quality, safety, and sustainability.

Commenting on the project win, **Mr S N Subrahmanyam, Chairman & Managing Director - L&T**, said: "This milestone marks a proud moment for L&T as we deepen our engagement in the global clean-energy landscape. Partnering with TenneT and Hitachi Energy for this pioneering program underscores the confidence our customers place in L&T's growing capability to execute complex, technology-intensive infrastructure projects. We thank TenneT for their trust and confidence and remain committed to delivering this development with excellence, safety, and sustainability at its heart".

Mr Subramanian Sarma, Deputy Managing Director & President - L&T, added: "This collaboration is a significant step forward for L&T's Offshore Wind Business. It not only validates our engineering and project management strengths but also demonstrates our ability to deliver integrated HVDC solutions for large-scale renewable projects. We are grateful to TenneT for this opportunity and look forward to contributing to their ambitious North Sea energy transition program through reliable, world-class execution".

Background:

Larsen & Toubro is a USD 30 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focussed approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.
