L&T-BEL's 5th Gen Fighter Aircraft Alliance onboard Dynamatic Technologies as Exclusive Partner

Mumbai, November 04, 2025: The consortium of L&T and Bharat Electronics Ltd (BEL), which is pursuing India's 5th Generation Fighter Aircraft (AMCA), is pleased to announce the onboarding of Dynamatic Technologies Ltd (DTL), as an exclusive partner for the programme.

This collaboration will combine DTL's global expertise in complex aerostructures and sub-systems manufacture for leading aerospace original equipment manufacturers, with L&T's engineering excellence and BEL's cutting-edge electronics expertise. This synergy brings unique strength to AMCA's development and boosts domestic capabilities in advanced aerospace manufacturing.

Commenting on the development, **Mr Arun Ramchandani, Senior Vice President & Head, L&T Precision Engineering & Systems**, said: "Adding Dynamatic Technologies as an exclusive partner to this consortium brings unmatched agility and precision to our mission. This partnership is as much about building a next-gen fighter jet as it is about redefining the Indian Aerospace industrial ecosystem".

Mr Udayant Malhoutra, CEO & Managing Director, Dynamatic Technologies Ltd, said: "We have been at the forefront of building supersonic aircraft structures for the past three decades. Our pioneering legacy, combined with advanced engineering expertise of Larsen & Toubro, brings together a unique partnership with the capabilities required to deliver India's fifth-generation fighter aircraft".

About L&T

L&T is a USD 30 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focussed approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.

About Dynamatic Technologies Ltd

Dynamatic Technologies Ltd (DTL) is a global engineering company specialising in high-precision design and manufacturing. It delivers precision-engineered products for metallurgy, aerospace, hydraulics and security applications. DTL's state-of-the-art design and manufacturing centres in Europe and India enables it to serve its international clientele across six continents.
