L&T wins new orders (Large*) in India and abroad for Power Transmission & Distribution business

Mumbai, January 07 2025: The Power Transmission & Distribution (PT&D) vertical of Larsen & Toubro has won new orders in India and the Middle East.

It has won an order to implement Advanced Distribution Management System in West Bengal. This technology makes power distribution smarter by combining Outage Management System and Distribution Management System functionalities. Through real time monitoring and control of medium and low voltage networks, the reliability of the network will be enhanced with quick isolation of faults and faster restoration.

In Saudi Arabia, an order for a key 380kV Substation which will facilitate evacuation of solar generation has been secured. Then, at a major city project in Kuwait, PT&D has won a 400kV Substation order.

In Dubai, PT&D has bagged orders for establishing a set of EHV substations which includes a 400/132kV Substation. Several substations are being added to the Emirate's power transmission infrastructure as it seeks to remain a preferred destination to live, work and visit.

Background:

Larsen & Toubro is a USD 27 billion Indian multinational enterprise engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.

* Project Classification

Classification	Significant	Large	Major	Mega	Ultra-Mega
